Example Breakdown of Marking Criteria

To illustrate how the mark scheme functions, consider a typical question from the Jan 2010 paper:

Question: Describe how enzymes work to catalyze biological reactions.

Expected points for full marks:

- Enzymes are biological catalysts. (1 mark)
- They lower the activation energy required for a reaction. (1 mark)
- They have an active site where the substrate binds. (1 mark)
- The enzyme-substrate complex forms temporarily. (1 mark)
- The enzyme releases the product and remains unchanged. (1 mark)

Mark scheme guidance:

- Full marks are awarded if all points are correctly described.
- Partial marks can be given if some points are included, such as mentioning the active site or the enzyme being unchanged.
- Vague answers like "enzymes make reactions faster" are insufficient unless elaborated with details about activation energy.
